Twinkle

## **Client : Bonnie Brown**

The seller aims to maximize profit by selling their house in a middle-class neighborhood.

### **Hypothesis :**

#### **1. Timing Impacts Sale Price**

The month or season when a house is sold significantly impacts the sale price.

#### **2. Location Influences House Value**

The geographical location of the house positively influences the price per square foot.

#### **3. House Characteristics Affect Sale Price**

Specific house features — such as grade, living area size, and renovation status — have a significant impact on the final sale price.

Features	Summary
Total houses	21,420
Average price	\$540,739
Price range	\$78,000 — \$7,700,000
Average living space	2,083 sqft
Living space range	370 sqft — 13,540 sqft
Bedrooms	Average 3–4 bedrooms
Bathrooms	Average 2–3 bathrooms
Floors	Mostly 1–2 floors
Waterfront properties	Extremely rare (~0.7%)
Year built	Ranges from early 1900s to recent
Average grade	7–8 (medium-high quality)
Price per sqft (avg)	\$264

## Average Home Price Trends (Monthly)

# Housing Prices in King County: A Spatial View

# Price per Square Foot by Neighbourhood

# Price per Square Foot: Middle-Class Neighbourhoods

# Top Features Influencing Middle-Class Home Prices

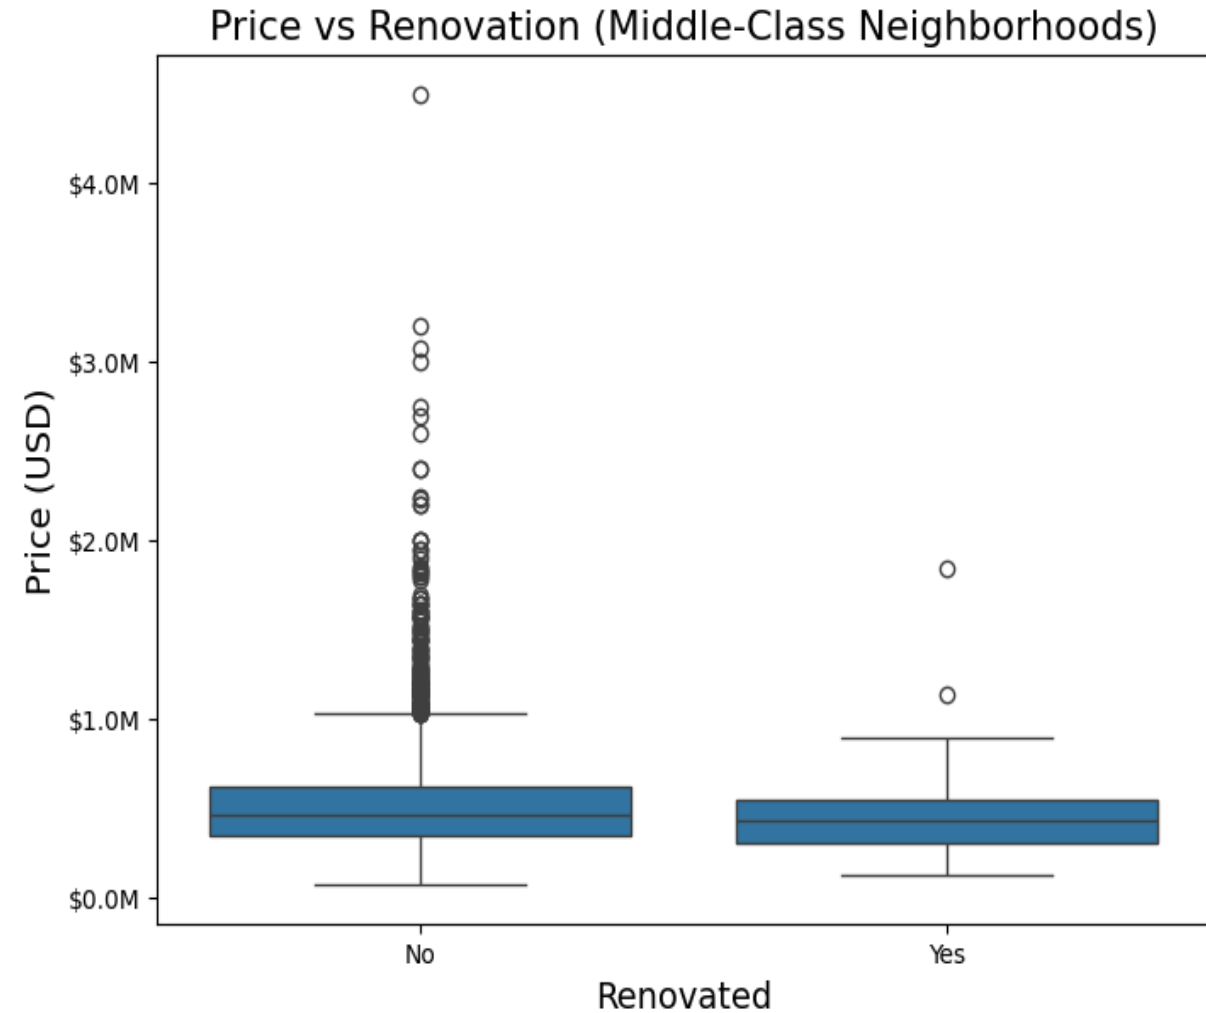

# Renovation Impact on Home Values

- Renovated homes exhibit a lower median sale price.
- Unrenovated properties show greater price variance.
- High-value outliers are more common among unrenovated homes.

# Conclusion

## **Recommendations:**

**Sell in Spring (April to June).**

**Focus on visible improvements — living space and grade.**

**Avoid costly renovations unless necessary.**
